DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

Claims 18-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ream et al., U.S. patent 5,667,824, in view of Hager et al., U.S. Patent 4,975,288, Laws, U.S. Patent 810,210, McDonald, U.S. Patent 3,062,662, and "LMC International" for the reasons set forth in the previous Office Action.

Response to Arguments

Applicant's arguments filed July 13, 2005, have been fully considered but they are not persuasive.

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

In response to applicant's argument that Ream and Laws and/or Hager could not be literally combined, the test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary

Art Unit: 1761

reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981). Additionally, the Examiner did provide motivation for these combinations on page 3 of the previous Office Action where it states, "It therefore would have been obvious to inject gum formed by the method of Ream with a center-fill semi-liquid material, as taught by Hager and Laws, in order to incorporate additional flavors and keep the gum in its moist and plastic condition for a long time."

Applicant also argues that the combination of McDonald and "LMC International" do not provide a candy coated gum that may be shaped into a ball. The Examiner points out that it was notoriously well known to shape lollipops into balls, as evidenced by "LMC International." As such, it would have been an obvious matter of choice to form the candies into conventional ball shapes instead of the bell shapes taught by McDonald.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 1761

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
